GOOD TO KNOW

A co-pilot, not a mechanic.

A car is expensive and its breakdowns are scary when you know little about engines. Assistants like ChatGPT, Gemini or Le Chat read a warning light from a photo, decode a listing and explain a quote, without knowing your vehicle or replacing a mechanic. Three reflexes first.

- **Safety is not a guess**

Brakes, steering, tyres, airbags: for anything touching safety, a professional decides. AI points you in a direction, it never certifies that a vehicle is safe.

- **AI does not know your car**

It ignores the real history, the engine's condition and your local prices. Give it the make, model, year and mileage, and always cross-check.

- **Never pay on trust**

Facing a listing, never pay by wire or gift card before seeing the car. Anonymise your personal data before pasting it into an AI.

The right reflex: AI puts you on the trail, a pro confirms before you pay or drive.

THE METHOD

Five moves, ten prompts.

Mastering your car comes down to five moves: choose the one you need, buy without getting fooled, understand what it tells you, maintain it so it lasts, and fix it when it fails. Ten prompts, two per step.

*Every prompt follows the same recipe: Role, Context, Task, Format.
Copy the structure, change the brackets.*

The Real Need

PROMPT TO COPY

Role: you are an impartial car advisor.

Context: I am looking for a car for [use, journeys, number of people], budget [amount], [new or used].

Task: help me pin down the type of vehicle I actually need.

Format: two or three car profiles that fit, their upsides and

limits, and the questions to ask myself before choosing, without naming a brand at random.

What you get

A choice driven by your needs, not by ads. Knowing which type of car suits you keeps you from paying for useless options or regretting it too late.

The All-In Budget

PROMPT TO COPY

Role: you are an expert in the true cost of a car.

Context: I am considering [a model, a category] and I drive

[yearly mileage] in [city, countryside].

Task: estimate the real cost, beyond the purchase price.

Format: a list of items (fuel, insurance, servicing, tyres,

depreciation), a ballpark for each, and a reminder that the

amounts vary by region.

What you get

The sticker price is only the start. Costing insurance, fuel and servicing before you buy spares you the nasty surprise of a budget that blows up.

The Listing Decoded

PROMPT TO COPY

Role: you are a wary, seasoned used-car buyer.

Context: here is a listing: [paste the text, the price, the

mileage, the year, and what the seller says].

Task: spot what looks off and what I must check.

Format: any warning signs, the questions to ask the seller,

the points to inspect at the viewing, and a reminder to never

pay before I have seen the car in person.

What you get

A listing read with a pro's eye. Spotting a scam or a hidden fault before you drive out saves time and keeps you out of a costly trap.

The Negotiated Price

PROMPT TO COPY

Role: you are a calm, fact-based negotiator.

Context: I want to buy [model, year, mileage] listed at [price], and I have noticed [flaws, weak points].

Task: prepare me to negotiate without offending or overpaying.

Format: a reasonable price range to aim for, three arguments

backed by facts, the phrases to open and to close, and the point where I should walk away.

What you get

Arguments, not nerve. Arriving prepared with facts gives you the confidence to discuss the price and to leave calmly if the deal is a bad one.

The Warning Light

PROMPT TO COPY

Role: you are a patient, plain-speaking mechanic.

Context: a light came on my [make, model, year] dashboard.

Describe its colour and shape, or attach a photo.

Task: explain what it means and what I should do.

Format: the meaning of the light, whether I must stop or not,

the careful steps to take, and when to see a garage.

What you get

A warning light that stops being scary. Knowing at once whether you can drive on or must pull over prevents both panic and a serious breakdown.

The Inspection Report

PROMPT TO COPY

Role: you are an expert on vehicle inspection reports.

Context: I received an inspection report: [copy the flagged points, or attach it].

Task: explain each point and how serious it is.

Format: every fault in plain words, which are urgent or not, a sense of the repairs to expect, and the questions to ask the garage before accepting a quote.

What you get

A technical report at last readable. Knowing what is urgent and what can wait keeps you from paying for needless repairs in a rush.

The Service Schedule

PROMPT TO COPY

Role: you are a car maintenance advisor.

Context: I have [make, model, year, mileage] and I drive about [yearly mileage].

Task: propose a service schedule that is simple to follow.

Format: the routine services and how often, what I can check myself, what goes to the garage, and a reminder to also follow

the manufacturer's booklet.

What you get

A car that lasts far longer. Regular, planned servicing costs much less than an avoidable major breakdown, and protects the resale value.

The Move That Prevents Breakdowns

PROMPT TO COPY

Role: you are a garage owner devoted to prevention.

Context: I want to care for my car day to day, without being a mechanic: [your level, your use].

Task: teach me the simple checks that matter.

Format: the easy checks (tyres, fluids, lights), how often, how to do them safely, and the warning signs between two services.

What you get

The small moves that save big. Checking your tyres and fluids takes five minutes and prevents most roadside breakdowns before they happen.

The Breakdown Diagnosed

PROMPT TO COPY

Role: you are a calm breakdown helper on the phone.

Context: my car [describe the symptom: noise, smoke, won't start, behaviour] on [make, model, year].

Task: help me understand it and react safely.

Format: the possible causes from simplest to most serious, what I can check without risk, when to cut the engine, and

a

reminder to call a pro if any doubt remains.

What you get

A cool head at the roadside. Understanding a symptom helps you react without making the fault worse and decide fast whether to stop or drive on.

The Repair Quote Checked

PROMPT TO COPY

Role: you are an expert who reviews repair quotes.

Context: a garage offers me this quote: [copy the lines, parts, labour, prices] for [the problem].

Task: help me judge whether it is fair and complete.

Format: each line explained, what looks normal or high, the questions to ask, and a reminder that a second quote is still the best way to compare.

What you get

A quote you no longer just accept. Understanding what you are billed and asking the right questions keeps you from overpaying for a murky repair.

THANK YOU · A CAR MASTERED

A useful tip, a big thank you.

These cards are offered to you, ad-free. Our only reward is your appreciation.

Give us 30 seconds

Take a moment to say thank you on one of our networks. A public word, even a short one, encourages us to keep supporting you, tip after tip.
