

10 ready-to-copy AI automations

SYSTINFO free kit - veille.systinfo.org

1. AI-assisted email replies (Gmail + n8n + AI)

'New email' trigger -> the AI drafts a professional, concise reply -> you approve in one click.

2. Automatic document summaries (n8n + AI)

Drop a file in a folder -> text extraction -> summary + 5 key points + action items. Ideal for reports, contracts, studies.

3. Meeting minutes (Whisper / NotebookLM)

Record the meeting -> automatic transcription -> structured minutes with tasks and owners.

4. Daily competitive watch (Tavily + n8n + AI)

Every day at 7am: Tavily searches your keywords -> the AI summarises -> email digest. Zero manual browsing.

5. Social posts from an article (n8n + AI)

Paste a URL -> the AI writes a LinkedIn post, a Facebook post and a tweet, tone adapted to each network.

6. Smart message triage (AI classification)

Incoming forms / WhatsApp -> the AI classifies (quote, support, HR...) and routes to the right person or channel.

7. Automatic post visuals (ChatGPT Images / Ideogram)

From the post title -> a visual in your brand colours, generated automatically.

8. FAQ over your documents - RAG (HuggingFace + vector DB)

Index your documents -> a chatbot answers questions citing your sources. Great for internal or customer support.

9. Automatic payment reminders (n8n + AI)

Overdue invoice -> personalised, courteous reminder with amount and due date. Escalates if still unpaid.

10. Transcription + translation (Whisper + AI)

Video or audio -> transcription -> translation (FR, EN, Arabic, local languages). Subtitles, articles, accessibility.
